#### Cute Fruit

Choose from the strawberry, pineapple or grapes. Or if you're feeling adventurous try design your own fruit

### Cuddly Creatures

Fox, deer or mouse, you choose. Make them all and create your own little creature family.

### Tinfoil

**Tinfoil Moon**

The moon is made of tinfoil right? This time it is. This simple space themed art makes for a beautiful piece.

All it takes is a circle of tinfoil pressed over circular shapes then glued to a piece of black card.

Instructions found at

### Tinfoil Robots

**Tinfoil Pendant**

We all like to bling it up at times and this is an inexpensive way to make your own beautiful creations. Create patterns using glue or a ball point pen then gently press on glued tinfoil to give the metallic look, add it to a necklace or keep as a silver look coin. It's as easy as that.

Instructions found at  
[oscn.nz/files/tinfoilpendant.pdf](https://oscn.nz/files/tinfoilpendant.pdf)

All ages love robots and this guy is sure to entertain.

The basic shape of the robot is made up of small boxes covered in tinfoil and glued together. The rest uses a bit of imagination and the odds and ends you can find in any tool box.

### Stained Glass Tinfoil

Stained glass is always beautiful and colourful and you can make your own stained glass inspired piece with the technique below. Using a similar technique as the pendants, glue is applied to card then covered with tinfoil. Then a mixture of glue (clear drying) and food colouring is added to the segments. These will dry clear and give a beautiful reflective look to the piece.
