

# Nature Insects & Animals

## Items needed (quantity per creation)

- Dry leaves and other found nature items
- Scissors

## Optional

- Glue
- Card
- Permanent marker

## Instructions

This craft could be used in one of two ways. The first option is to use the found items to create insects and animals, then reuse them to make other creatures. The second option would be to glue the items down onto card to create beautiful natural artworks.

1. Either option begins with collecting natural items, leaves, sticks, seed pods etc. Make sure they are dry so they don't rot or wilt.
2. The next step is to look through the shapes and try create some animals. Page two of this document has some photos for ideas of shapes and elements.
3. Next, once you have made your creation you can either reshuffle and reuse the items or glue them down onto card to make little artworks. If you do this step you could use a permanent marker for details.
